East Zone is peculiar in its geographical location, situation, the socio-economic status, cultural patterns, migrant population, the disease pattern and the type of houses and structures; from the whole of Ahmedabad. Major parts of the population in most of the wards live in slums and challis and are migrants from other states having different religious and cultural customs and habits than main stream population. So, the main problem of East Zone is congested population, difficulty in educating people about hygienic habits, sanitation and disease prevention.

Here follows a brief presentation of the activities done by the Health Department (East Zone).
